

2K EPOXY PRIMER

A high build, fast-drying, multi-substrate primer with excellent adhesion and corrosion protection properties to all ferrous and non-ferrous metal surfaces such as galvanised steel and aluminium. It is specially formulated to enhance the adhesion and anti-corrosion properties and provide the ultimate long term protective coating system.

Features and benefits

- Outstanding adhesion to multiple substrates
- Fast drying time - overcoat wet on wet after 30 mins
- Easy to sand - wet or dry
- Solvent and chemical resistant
- Excellent corrosion and moisture protection
