

Instructions for filling ToughOX tintable aerosols

ToughOX is a high-performance 2K polyurethane structured coating, giving the ultimate protection for truck bed lining and many other industrial applications. ToughOX provides an extremely durable, impact-resistant, impermeable finish.

ToughOX 2K tintable aerosols provide the opportunity to offer ToughOX 2K aerosols in virtually any colour. The 2K 400ml aerosol comes partially filled (300ml); the final 100ml needs to be added prior to use, with a formulation of ToughOX base and your chosen **solvent-based colourant**. (such as; solvent-based basecoat, 2K and universal colourants)

The formulation is 4:1 (4 parts ToughOX base to 1 part mixed **solvent-based colourant**)

Instructions

1. Mix the colour in your chosen **solvent-based colourant**.
2. Add 20ml of this colour to 80ml of ToughOX base, mix thoroughly.
3. Once mixed, fill 100ml into the ToughOX 2K tintable aerosol with your aerosol filling machine.
