

# SUPER FAST HIGH BUILD PRIMER

**PRO**  
**XpressBuild**

Excellent  
anti-sag properties

Very high build

Extremely fast dry  
to sand time

Excellent  
adhesion

# SUPER FAST HIGH BUILD PRIMER

XpressBuild is an ultra-high performance 1K primer filler, with excellent film build and hold up along with an exceptionally quick dry to sand time. It can be used direct to many substrates including bare metal and most plastics and is suitable for water or solvent based topcoats.

- EXCELLENT ANTI-SAG PROPERTIES – no runs or reworks
- VERY HIGH FILLING PROPERTIES – quicker coverage of sanding marks
- EXTREMELY FAST DRY TO SAND TIME – 10 minutes at 20°C giving faster job throughput.
- EXCELLENT ADHESION TO DIFFICULT SUBSTRATES – adheres to bare metals and most plastics reducing the need for other specialist adhesion promoters.

## BODYSHOP FEEDBACK

- *“At 20°C, we were able to sand in under 10 minutes!”*
- *“For an extreme test, we successful covered P80 grit DA sanding mark in 3 coats! While we would recommend excessive film thickness this demonstrates the XpressBuild’s excellent ability to prime the most demanding repairs!”*

Colours available are  
Grey, Black, Blue, Red & White
