

XPRESS605 - Body shop testimonials

"We tried the **XPRESS605** on several different type of jobs and always got excellent results, baked for 5 minutes at 60°C with no gloss drop. One of my jobs was a show car bonnet. I achieved an outstanding gun finish and after 3 months there was still no drop in gloss. I normally use the Novol Spectral 565-00 but I'm very happy to recommend this as a better product."

**Richard -
J D Autos**

"I found the **XPRESS605** very easy to use, gives a great gun finish with no gloss drop. I simply baked at 60°C for 5 minutes such a saving on energy and time!"

**Wayne -
Penfold Panels**

"I did a complete respray with the **XPRESS605** and it was lovely to spray. It stayed open for a good time so gave no dry edges – got an outstanding off the gun finish with excellent gloss hold up after baking, A few nibs needed polishing out but these were very easy, much easier than other clears such as Max 0396."

**Sean -
SCH Coachworks**

"In the past, I have used several very fast quality clear coats, such as the Novol Spectral 565-00, but the **XPRESS605** is easily the best, it's so fast with no gloss drop at all."

**Paul -
Grand Garage**

"We have tried **XPRESS605** in a large body shop group who would normally use Standox K9580. The feedback we got was that it is a very good clear coat and easily as good as, if not better, than Standox! They are leaving 1 week to test polishing."
